One Line Project Solutions was founded in June 2006 by our Principal Mr. Neo More. The business offers key main services in engineering industry mainly, mechanical engineering and project management. Our experience spreads predominantly in the water infrastructure, petrochemical, and mining industries.

OUR OVERVIEW

Our principal obtained his B-Tech: Mechanical Engineering with UNISA in 2012 and has over 10 years' experience at SASOL in plant equipment design and maintenance, steam and water reticulation, statutory compliance and project management. His experience expands to related industries such as mining and rail infrastructure in his tenure as a maintenance specialist. He is professionally registered as a Project Management Professional (PMI), SAIMEchE (Member) and ECSA Candidate Pr.Techologist. These accreditations have assisted him in building a reputable business and has afforded him the opportunity to work with reputable clients.

Our company employs the skills of qualified and accredited professionals in the engineering industry. Our members and partners possess the correct experience to provide unique quality solutions on schedule, all in acceptable budget constraints. We pride ourselves in also empowering young professionals to give them the exposure and opportunity to grow.

VISION & MISSION

Vision

Our vision is to become a known reputable service provider in South Africa, expanding into Southern Africa. We want to have safe operations and project offices where essential services are required, and to be in the center of a solution driven industrial revolution, especially focusing on water and service delivery infrastructure.

Mission

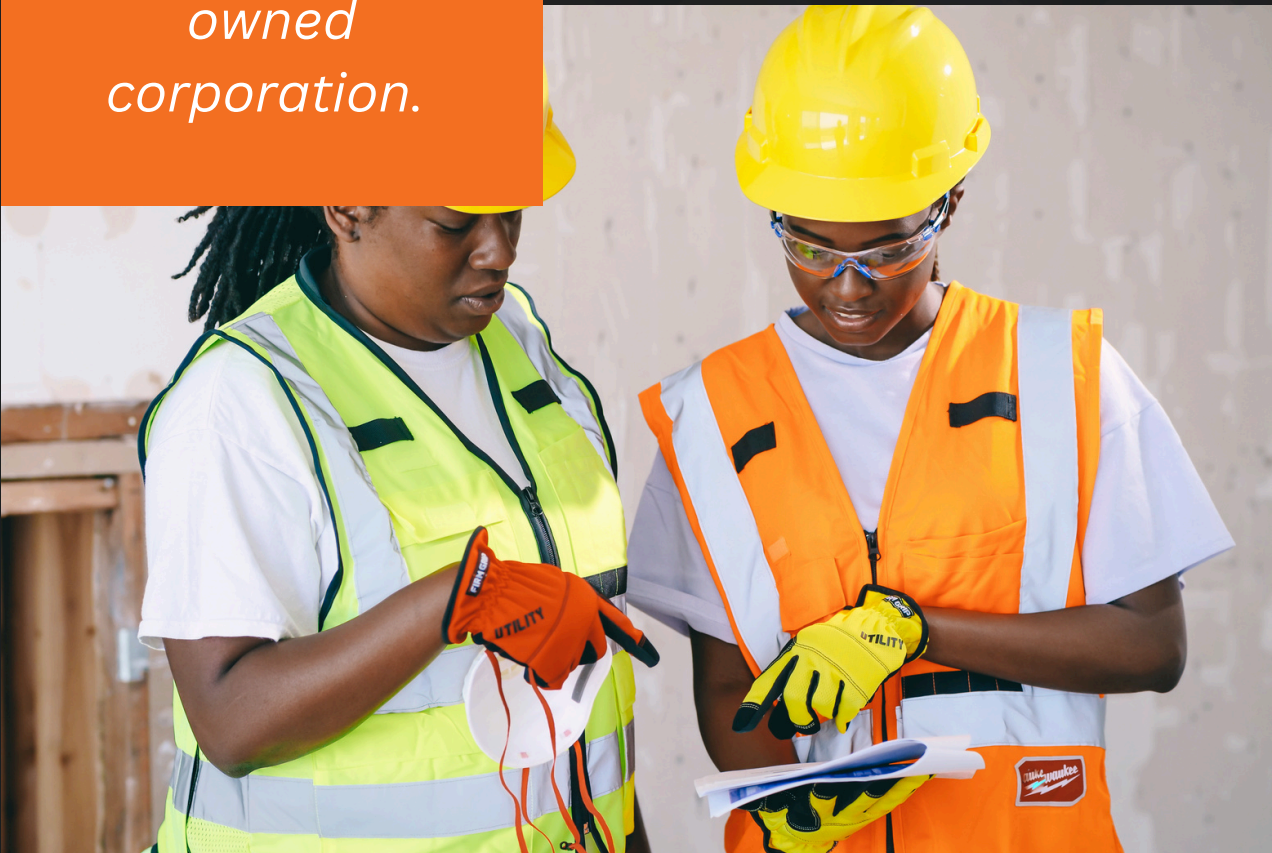

We want to provide safe solutions for the development and maintenance of infrastructure to those who need it most, disadvantaged communities. Our aim is to target mining communities, water boards and distributors, municipalities, and other infrastructure operators to offer them our solutions. With the desired outcome in mind, we want to effect change to the end users, woman and children who will be the ultimate beneficiaries of our services.

HOW WE WORK

One Line Project Solutions is a 100% black owned corporation.

At One Line Projects Solutions, we are involved with community development projects, that support communities to identity, the use their assets to improve the quality of their lives.

Supporting your on-site operations and ensuring value for service - is our prime priority. Our experience, knowledge, and innovation allow us to meet the various and complex needs of our clients.

Our company employs the skills of qualified and accredited professionals in the engineering industry. Our members and partners possess the correct experience to provide unique quality solutions on schedule, all in acceptable budget constraints.
